

Vernier security pin

Item no. 100981

Application

Quick, safe and clatter-free connection in the vernier system

Characteristics

- Easy installation: First insert the longer limb into the suitable pair of holes. Once the final position is reached, insert the shorter limb into the suitable pair of holes. Bend the longer limb towards the vernier top part to secure it.
- When pushing the security pins in firmly, the two parts will interlock, and clattering is thus prevented.

Technical data

Material	Zinc-plated steel wire	Packing unit	100 pcs. / PU; 576 PU / pallet
Diameter	2.5 mm	Fire behaviour	Class A1
Shelf life	Unlimited	Load-bearing capacity	-
Storage conditions	Store in a dry place protected against moisture and wetness	Corrosion protection	Klasse B

(Relevant test certificates / declarations of performance can be requested, if necessary)

Notes

- Suitable for use in damp rooms only if provided with special anti-corrosive coating (on request)
- Not suitable for outdoor installation
